Git

Введение в системы контроля версий

Questions on Stack Overflow, by Year

Version Control Systems Used by Developers, Eclipse Community, 2014

Создание репозитория

git init

Конфигурация репозитория

```
git config [--global] user.email "you@example.com"
git config [--global] user.name "Your Name"
```

Добавление файла в локальный репозиторий

git status
git add <file-name>

Добавление файла в локальный репозиторий

git log [--graph]
git commit -m "Commit name"

Staging Area Commit History

git branch <branch-name>

git checkout <branch-name>

git checkout -b <bre>branch-name>

```
git checkout main
git commit
git checkout future
git commit
```

git remote add origin <remote-url/ssh>

git push -u origin main

git push -u origin main (git push)

Merging vs. Rebasing

Merge

git checkout feature git merge main **Feature** git merge feature main Main

Rebase

Feature git checkout feature git rebase main Main

git pull

git pull --rebase

rebase -i

revert

reset HEAD

Learn Git Branching!

tag

cherry-pick commit --amend
